

# Christian A. Sweat

## Software Developer

sweatchristian03@gmail.com — (US) +1 (404) 387-0435

[\[Portfolio\]](#) — [\[GitHub\]](#) — [\[LinkedIn\]](#)

### DEVELOPMENT SKILLS

**Languages Used:** HTML, CSS, JavaScript, Java, Kotlin, Python, Batch, Bash, SQL, C++, C#

**Technologies:** JavaScript: Node.JS, Express.JS, React.JS | Java: Maven, MySQL, Apache, Spring

**Skills:** Version Control, RESTful APIs, Unit/Integration Testing, Cloud, CI/CD, Agile Project Management

### PERSONAL EXPERIENCE

**Terminal Portfolio** [\[Link\]](#) — Powered with Vanilla JavaScript ~ Actively Hosted with GitHub Pages:

- A portfolio made to emulate a Linux/Bash Terminal. The project is still actively in development.

**Rusty** [\[Link\]](#) — Powered with Python 3:

- Script developed as a demo for Lumen Technologies to showcase the automation of ticket creation.
- Harvested rich data content using a multitude of NLP logic and mapping functions.
- Used simulated keyboard and mouse actions to automate ticket creation on the client-side.

**BankPortal** [\[Link\]](#) — Powered with Java 17 LTS:

- Client-side interface for a bank connection, using Oracle MySQL and Java Socket.
- Since the connection is over the web, the client uses a SHA256-encryption and Base64.

**DSI IT Website** [\[Link\]](#) — Powered with Node.JS ~ Out of Production:

- A website made for a startup company. Strictly using NodeJS and JavaScript

**PMGrader** [\[Link\]](#) — Powered with Python 3 ~ Released:

- A script to grade a quiz provided your submission and the answer to the question in a file.

**2DCPPGame** [\[Link\]](#) — Powered with C++ ~ Beta:

- A 2D Game built with C++ and the SFML library. Built as a project to learn C++ fundamentals.

### PROFESSIONAL EXPERIENCE

**Lumen Technologies** — Change Management Specialist: [May 2022 — Present]

- Notifying customers of future network maintenances activities and affected services
- Create Vendor planned network maintenances in internal Lumen system, and notify appropriately
- Generate and validate service impacts of network events, and verify no SLA violations
- Inform all dark fiber customers during any part of a service-affecting event
- Developed [Rusty Script](#) and proposed other automation ideas for Lumen.

**True I.T Inc.** — IT Field Specialist: [Dec. 2021 — May 2022]

- Established Active Directory & Office 365 Users, Configured VPN Clients, Monitored Firewalls
- Mastery of Windows Vista – 11, Usage of Mac OS and Ubuntu
- Developed multiple batch scripts to increase productivity
